

```
std::integral_constant  
< bool, is_basic_json  
< std::remove_cv< std::  
remove_pointer< BasicJsonContext  
>::type >::type >::value || std  
::is_same< BasicJsonContext, std  
::nullptr_t >::value >
```

```
detail::is_basic_json  
_context< BasicJsonContext >
```

A blue arrow points from the detail::is_basic_json_context expression in the right box to the is_basic_json template argument in the left box.
